## REMARKS

During the week ending the 7th June 1947, in British India (excluding North-West Frontier Province, Bengal Presidency and Central Provinces) and in the Indian States shown in this statement, the total number of deaths recorded in 167 towns having a population of 30,000 and over was 9,757. The mid-year estimated population of these towns was 19,807,106 and the death rate was 25.6 per thousand of the population. Births in the same towns numbered 11,357 giving a birth rate of 29.8 per thousand of the population. In British India alone the corresponding birth and death rates were 30.3 and 26.2 per thousand of the population respectively.

(A) *British India*.—The following towns in British India returned a death rate of 50 or over per thousand of the population:—

Hardwar Union (92.4); Benares (85.1); Sambhal (74.6); Bhiwani (73.2); Jhansi (71.8); Hissar (70.9); Gaya (67.2); Hathras (54.6); Hapur (54.3); Ambala (54.2); Rewari (52.9); Mirzapur-Bindhachal (52.6); Etawah (52.0); Pilibhit (50.3) and Ferozepore (50.2).

The high death rates in these towns were mainly due to deaths from fever. Deaths from respiratory diseases also

were high in Benares, Sambhal, Hathras, Hapur, Etawah and Ferozepur. Dysentery and diarrhoea accounted for a fairly large number of deaths in Benares and Etawah.

In 154 towns in British India, there were 22 deaths from cholera, 92 deaths from smallpox and one death from plague. Of the deaths from cholera Benares recorded 9; Bettiah and Monghyr 3 each; Patna and Arrah 2 each; Sitapur, Hapur and Gaya one each.
